

Safety Sheet—NiMh Battery

WARNING: USER MUST READ AND FOLLOW ALL INSTRUCTIONS AND WARNINGS AND PRECAUTIONS.

WARNING: This battery is not a toy and care should be taken when handling and charging the battery. Failure to do so could result in serious injury to user and others in the area. Details listed below must be followed to ensure no harm is done to persons and property.

Handling and Storage

- Never drop battery.
- Never alter battery in any way.
- Never puncture battery.
- Never short circuit battery by connecting terminals.
- Never leave battery in model.
- Never leave battery connected to model or charger after use
- Always store battery in dry cool location.
- Always store battery in safe battery storage bag.
- Keep battery away from water.

Charging Battery

- Always make sure battery is not damaged before charging.
- Only use charger that is specifically designed for battery.
- Refer to charger instructions for charging details.
- Never charge a battery that is hot to the touch.
- Remove battery from charger if battery becomes hot to the touch.

Safety

1 RC Racing, LLC is not liable for the misuse or mistreatment of this battery, all warnings and precautions must be followed to ensure safe use. In the event a battery becomes hot to the touch or starts to smoke or outer covering starts to melt while charging/running or you see any change in the battery condition, remove battery from charger or model and then safely move battery to a safe location in open outside air away from any persons and property. Leave battery in outside open area for at least 2 hours to allow battery to cool and stabilize. Once battery has cooled and is no longer a danger, store battery in plastic sealed container to eliminate any shorting and then battery must be recycled. Do not store battery with other waste. Call your local recycling center for information on battery recycling in your area. Handle any damaged battery with great care, batteries are corrosive so ensure damage batteries and its contents never contact skin in any way. If skin comes in contact with damaged battery, immediately wash the affected area with soap and contact medical care if additional care is needed. If damaged battery or its contents contact your eyes in any way, wash with water for at least 15 minutes and then contact medical care immediately.
